President’s Message
by Leslie Tanimura

It’s 9:00 pm and I’ve just finished my dinner, a nutrient deprived meal comprised of a Guinness, sesame sticks, carrot sticks and chocolate covered raisins. The twins are now 2 and a half years old and one week ago, were moved from their cribs to freedom-to-roam toddler beds. Andrew and Avery share a room. They will not be accompanying me to the biennial meeting. Solely for that reason, our sumptuous gathering could be held in a swamp and I would still be looking forward to the event. But thanks to Bill Keaty and Karen Jones, our meeting will be held in fabulous, glamorous New York City and I cannot wait to plant myself in seat #3C, sleep, and upon arrival, visit with all of you.

Many alumni will recall that four years ago, the IUPDAA board members reassessed the June meeting dates for the 2009, 2011 and 2013 biennial meetings. We identified that during those years, the AAPD annual sessions would be held in locations that were expensive and sought after vacation destinations. Moreover, we believed Honolulu, New York City and Orlando to be venues that many alumni would tour prior to or after the annual sessions. The decision to “piggyback” our biennial meeting onto the AAPD annual session was not an easy one to make. However, we believed it to be a pragmatic way for graduates and their families to attend our Hoosier gatherings. The decision also recognized the geographic diversity of our alumni, a factor that continues to globally enhance our program’s excellent reputation. Please know that your enterprising board welcomes feedback and each of you should feel free to email Karen Jones (kdeery@iupui.edu) or myself (spike4sc@earthlink.net).

Raffle tickets, attendance at the biennial meetings, annual contributions... a myriad of ways to show you care and have a place in your heart for Indiana University and Riley Hospital. Do you remember your interview day? The first day of the residency and when you met your co-residents? The first paycheck party and the end of the year festivities at Dr. Weddell’s home? For me, a plethora of warm and wonderful memories. Dr. Avery and Dr. Weddell, thank you so very much for accepting me into the residency and for giving me the opportunity to fulfill my childhood goal of becoming a pediatric dentist.

Lastly, with this fourth and last message, I would like to thank all of you one final time for your generous support of our residents and alumni organization. I am also grateful for the unique opportunity to serve as your alumni president for the past two years. It has been an absolute pleasure. See you in New York City! Have a safe and speedy journey!

Join Us In New York!

The IUPDAA 23rd Biennial Meeting will be held this year in conjunction with the AAPD meeting in New York. Due to the venue this year, we have made every effort to compress the meeting so that it is affordable and easily attended by those attending the academy meeting. The IU meeting will be held at the Sheraton New York Hotel and Towers starting with registration and continental breakfast between 7:30 and 8:00 am.

Dr. Tom Kiebach promises to have an interesting, enlightening and lively presentation on Evidence Based Early Class III Treatment from 8:00 to about 12:00 or 12:30. In an effort to further compress the meeting and still make it enjoyable we will have our business meeting in conjunction with the luncheon immediately following Dr. Kiebach’s lecture. Our meeting will conclude with the Resident’s Presentations after lunch. Everything will be held in the Sheraton and should conclude by 5:00 pm and all of those attending the entire day will receive 7 CEU credits.

The banquet will be held at 7:00 pm at Uncle Jack’s Restaurant which is in walking distance from the hotel and promises to be a very enjoyable venue. During the banquet we will have the presentation of the Distinguished Alumni Award and will be honoring the graduating class of residents.

The IU Suite will be located in the Hilton across the street from the Sheraton and will be open for your enjoyment Tuesday through Saturday evenings from 5:00 pm until midnight. The auction will be held as usual on Friday. We are still looking for donations for auction items, please contact Karen Jones should you have an item that you can contribute. It is not necessary to bring the item with you to New York. Karen will need in advance a picture or a description of the item in order to be included in the auction.

Thanking you in advance for your support of our auction. If you will be attending the Academy meeting, please make every effort to attend our Biennial Alumni Meeting which promises to be compact, informative and lots of fun. I look forward to seeing all of you in New York.

Thank you
Bill Keaty, 2011 IUPDAA Biennial Conference Chair
The Role and Importance of Research and Scholarship in Dental Education and Practice*

Dean, New York University College of Dentistry

Understanding the role and importance of research and scholarship in dental education and practice requires an appreciation of dentistry as a learned profession. A foundational attribute for the members of such a profession has to be sheer intellectual curiosity—a trait as important for the clinician as for the scientist. That improved patient care results from technical advances made possible through research is not seriously disputed by anyone. What is less apparent, however, is the role for research in the education of dentists and in the broader life of dental schools. Accosting this matter requires a distinction to be made between research and scholarship: while all research qualifies as scholarship, not all scholarship qualifies as research.

Though the exact role of research in the educational process is open to debate, the importance of scholarship is not. An education colored by research is one way of achieving the intellectual rigor necessary for the professional. The key is cultivating in students a taste for complexity, for problems, and for problem solving. All dental schools without exception need to help students acquire this taste. In doing so, they will generate a few scientists; but, more importantly, they will create out of every graduate a man or woman of science. Only by becoming a person of science is there any hope that the practitioner will be able to acquire and assimilate new knowledge and to adapt to the changes in practice and in the profession that the future requires.

Congratulations to our newly published past residents!!

The following past residents have indicated that their research projects have been accepted for publication (and are “in press”) or been published since our last report. Great Job!!

Update on Resident Research Projects: 2010-2011

A brief update concerning resident research projects for the current two resident classes at IUSD / James Whitcomb Riley Hospital for Children. All First Year Residents are in the process of obtaining IRB approval for Indiana University at present.

I want to again thank Dr. Hala Henderson, through the Zawawi Pediatric Dentistry Fund, which funds the majority of resident research. We are fortunate to have the continued financial support

Post Graduate Program Director Report
by Dr. Brian Sanders

I am happy to report that all six graduates from the class of 2007 have successfully completed their Master of Science Degree. They include Drs. Amy Westerman, Lisa Leniski, Tammy Gierke, Greg Sheppard, Joseph Guido and Matt Lehair. While four of them came as little surprise, the last two, Drs. Guido and Lehair, proved me wrong and completed their thesis prior to their December 2010 deadline. I believe when I let Matt Lehair know that Joe Guido was ahead of him it pushed Matt to the finish line. Congratulations to all of them. Dr. Klein would have been proud of your class.

While you might wonder why I am bringing attention to this accomplishment it’s because prior to 2007 it was not a requirement that the residents get their master’s degree prior to getting their certificate in pediatric dentistry. The combined master’s degree and certificate was not initiated by me, but by the previous Program Director, Dr. Jeff Dean. Our graduates have always completed very worthwhile and relevant research projects as part of their graduation requirements, but because of personal obligations never succeeded in completing their master’s degree and publishing their work.

Perhaps many of you reading this are thinking when you were in the program how you almost finished your thesis but never got around to it. Perhaps not. While the benefits of getting a masters degree are many, if you ask the second year residents in April, they may not agree. When June 30th arrives there is a great sense of accomplishment and satisfaction that comes with getting your masters degree as well as a short term memory loss. The work that the graduate students have completed will add to the body of scientific literature in our field of Pediatric Dentistry and ultimately improve the stature of our residency program.

Greetings from John Hoffman
Director of Development
Indiana University School of Dentistry

You may have noticed in the Indiana University School of Dentistry Case for Support Document mailed in December of 2010, completion of the Dr. Paul E Starkey Research Professorship in Pediatric Dentistry is one of the primary goals of the Faculty Support element of the campaign.

I wanted to write to make you aware of other potential ways to contribute to the Dr. Paul E. Starkey Professorship. Besides the traditional ways of giving (check, cash or credit card), there are other vehicles for giving that may be better suited for your particular situation.

Transfer of securities, gifts of life insurance, charitable gift annuities, and IRA charitable rollover gifts are just a few examples of alternative ways to give that can greatly benefit you personally and assist greatly in the success of the campaign.

An excellent resource for more information on alternative ways of giving is the Indiana University Foundation website at http://iuf.indiana.edu. There, under the Guide to Giving section, you can choose the Gift Plan Types section on the left margin. You can find excellent information explaining how different vehicles for giving work as well as the advantages to you as a donor.

I recommend you contact Mr. John Keith at the IU Foundation in Bloomington at (812) 856-4237 or Ms. Estacia Brandenburg at the IU Foundation in Indianapolis at (317) 278-5653 for more specific information and details. They can provide professional recommendations and assist you in a gift plan at no cost to you. Please also feel free to contact me if you have additional questions or comments.

Thank you for your consideration and ongoing support of the Graduate Pediatric Dentistry program and the Indiana University School of Dentistry.

Sincerely,
John

Update on Resident Research Continued from page 2

of Dr. Henderson with respect to this important aspect of their post graduate education and the continued advancement of the Department.

Second Year Residents Research Topics

Dr. Gray Hicks: Future demands for dentist anesthesiologist in pediatric dentistry sedation: A survey of dental anesthesiologist residency directors and pediatric dentistry residency directors.

Dr. Ashley Killin: Development of Primary and Secondary Caries in Children Receiving Comprehensive Dental Treatment on Multiple Occasions Under General Anesthesia.

Dr. Nassim Olabi: The training and clinical practices of I.V. drug sedation of board certified pediatric dentists practicing in the United States.

Dr. Matthew Rasche: Comparison of Frankl score assessment in children following hospital based general anesthesia versus office based general anesthesia.

Dr. Jaime Steele: Fluoride content of commercially available infant foods.

Dr. Andrew Williamson: Current trends in pulp treatment in pediatric dental residency programs.

First Year Residents Research Topics (Working Titles)

Dr. Jason Ashcroft: A Retrospective Study of Comprehensive Dental Treatment in the Operating Room of Siblings

Dr. Rachel Dunlop: Pulp Therapy in Pediatric Patients with Congenital Heart Disease: A Survey of Pediatric Dentists.

Dr. Amy Hinz: Digital Radiography: Its clinical applicability in the pediatric dental setting.

Dr. Laura Juntgen: Factors Influencing Behavior Management Technique Selection and Utilization Among Practicing Pediatric Dentists.

Dr. Katherine Nichols: The Relationship Between Method of Payment and Patient Retention Length in a Pediatric Dental Practice.

Dr. Ethan Zuker: Presurgical Orthopedic Use and Protocol Among Cleft Lip
Meet Jane Ross

Jane joined the administrative staff of Pediatric Dentistry of IU/Riley last month, having served in an administrative support capacity nearly all of her career. She enjoys working with people, and helping others such as teaching the four-year olds’ Sunday school class at her church. She enjoys all kinds of music and playing piano and violin, and enjoys working with crafts, especially scrapbooking, sewing and crocheting. She lives in Carmel with her husband Walt and a fat, sassy cat named Dexter. Jane and Walt’s son Christian is currently a third-year Indiana University School of Medicine Resident, and their daughter Claire is a stay-at-home “Domestic Engineer” with a Ph.D. in Biochemistry from Washington University who writes children’s books for McGraw-Hill Publishing Company. Jane and Walt’s son’s family includes two “Grandboys,” and lives in Fishers, Indiana. Their daughter’s family, which includes two more “Grandboys,” lives in Newark, Delaware. Please join me in welcoming Jane to the IUSD family!

NYC Suite News

The 2011 AAPD meeting is just a few short months away. Are you ready for New York City? Is New York City ready for our alumni? I suppose we will just have to wait and see! This year, our alumni suite will be located at the New York Hilton.

As you already know, our IUPDAA Biennial meeting will be held prior to the AAPD meeting. So in the spirit of camaraderie, our alumni suite will open on evening of Tuesday, May 24 and will remain open every evening through Saturday, May 28. Please plan on attending our annual auction and raffle on the 28th. Auction and raffle items are still needed! Contact Karen Jones at (317)271-8959 or at kdeery@iupui.edu for donation information. Also, you have likely received the IUPDAA annual donation mailing. Please note the Adopt-a-Resident option on this form. The proceeds from this program help send our residents to New York City.

See you all in The Big Apple!

Chad Hazelrigg
Resident Life

by Andrew Williamson, Chief Resident

It’s hard to believe that I am writing another resident update!!!! It seems like I just wrote the fall newsletter a couple of months ago. However, here we are again! While the second year residents will hate to leave the lovely and entertaining children of Riley Hospital, we are all anxious to get out into the real world and begin our new lives as pediatric dentists. We will be sad to leave, but we know that our current first year residents are hard workers and will do a great job teaching and training our new incoming class, composed of 2 residents from Indiana University, 1 from Southern Illinois University, 1 from Ohio State University, and 1 from the University of Michigan. We wish you guys the best of luck in the completion of your research and certification!

All the residents are greatly looking forward to seeing all of the alumni in New York this year! This should be an entertaining week of catching up with alumni we haven’t seen in a while, as well as a great week of continuing education and activities in the Big Apple! We will be having plenty of activities in the alumni suite, so bring some cash and have some fun! With regards to the residents, this article will be a little more cut and dry, but I hope that it provides you with a gist of what’s new in our residents’ lives! And with that, let’s get started!

1st Year Residents

Jason Ashcroft

Jason has been hard at work completing his anesthesiology rotations, and will have a nice number of transfer ortho cases that are treatment planned and/or in progress by yours truly. He has proven to be a great pick from the MATCH system, and we are very happy that we have him at Riley! In what spare time Jason has from school, he has been working on his research, playing basketball at his church, and enjoying time with his wife Elda and daughter Emma. He also found a little time over the holidays to get in some hunting, where he was able to tag a coyote from his house! With the nice weather coming soon, I am sure Jason will try to find a baseball team where he can show off his pitching skills. Keep up the hard work Jason!

Rachel Dunlop

Rachel is such a ball of energy! I swear I never know what is going to come from her next. Rachel has been busy with oral sedation observations and the operating room. She is adjusting to the program very well, and she has proven to be a very hard worker, going above and beyond sometimes to attempt to facilitate great patient care. She is excited to be doing what she does, and she definitely can do things to make us all laugh. For instance, Rachel brought an interesting shipment of garments to our white elephant gift exchange this year, which turned out to be the most entertaining gift of the day. I will leave it at that! We love ya Rachel! 😊

Amy Hinz

Well, where can I start about Amy? Amy has proven to be the most serious yet most sarcastic 1st year resident we have. She is extremely organized and a very hard worker. Sometimes I don’t know how she stays so disciplined, but then I remember she is in the Navy, and that answers my question. Amy will be heading to Haiti with her father, Dr. Gary Hinz, for a dental mission in early March. I am extremely excited for her and the stories she will bring back from this journey. I am also happy to announce that Amy got engaged back in December. Her fiancé is an incredible guy, and they make a great couple! I wish you all the best! With Amy’s work ethic and motivation to see the program improve, I could think of no one better to take the reigns of being chief resident from my perspective, but that decision will be left up to the appropriate people at the appropriate time! And Amy, for the last time, please lock up the code cart! 😊

Laura Junten

Since our last article about Laura, I am happy to report that she has had no interaction with extraterrestrials and the alien jokes have subsided for the most part. Laura and her husband are doing well. She has been working hard, especially on getting her furnace fixed during the recent winter storm we had in early February, and managing her incredibly long hair that many of us have never seen before!!!! Seriously, Laura wears her hair up almost all the time, but when she straightens it, wow! While I would love to say that you could see it for yourself in New York, she recently had a few inches trimmed off, so you will have to wait till she grows it out again. Overall, we love having Laura around for all sorts of reasons, and I am sure she will do a great job as a second year resident!

Katie Nichols

Katie is overall just a fantastic person to be around. I want to get more and more dirt on her, but I literally cannot find anything to tease her about. She and her husband Scott are doing very well. If you watch Butler basketball, it’s possible that you may see them on television, as they go to almost every home game they can. Katie seems to be enjoying herself here at Riley, and if she isn’t, I can never tell. She is very good at keeping her cool regardless of the situation. Thanks for being so relaxed all the time Katie. It rubs off on us whether you know it or not!

Continued on page 6
**Resident Life Continued from page 5**

**Ethan Zuker**
Ethan is a pretty laid back guy. No matter how much is going on in his life, he is so relaxed and takes everything as it comes. When we first got Ethan at the program, I was so excited to have him because I got to spend some time with him when he did an externship with us. What a great decision for our program! His sense of humor and comical relief have not gone unnoticed. He always has a way to make you laugh and his sarcasm is a work of art. Love having this guy around! In addition, Ethan and his wife are now expecting!!! We are all very excited for them and can’t wait for the baby to get here! Congratulations you guys!!!

**2nd Year Residents**

**Gray Hicks**
Gray is still his good old self. Some things will never change, but you gotta love the guy! He is moving along with his research and getting lots of other things taken care of. Gray and his family will be going with the Air Force to Japan upon his graduation. While excited to graduate, I am sure they will be a little bit apprehensive moving to Asia to a country where English is by far not the primary language. All Gray’s kids are doing great, and his wife Carrie is a fantastic woman. Sometimes I don’t know how she does it, but she is a trooper, and I wish them the best in their journeys after Indianapolis! I will be planning on visiting, so keep in touch!!!!

**Ashley Killin**
Ashley is ready to start winding down here at Riley and escape back to the state of Colorado, where she can wake up to the Rocky Mountains every morning. I can’t blame her for being ready to graduate. I would love to wake up every morning to that scenic landscape. She has collected all of her data for research, and she is working hard on plans after she graduates. As of now, Ashley is planning on taking an associateship in Colorado with a future buy-in option. She will be able to be close to her family, which is very important to her. We hope that everything works out for you in Colorado Ashley! We all know how bad you want to be back there!

**Nassim Olabi**
Nassim is still working very hard to do well in residency, complete his research, and take care of his young boy Ethan. Along with the responsibilities of residency and fatherhood, Nassim has also taken on the responsibility of being my best man in July. I have no doubt that he will deliver for the bachelor party, and that he will be a fantastic best man. Nassim is planning on associating with a pediatric dentist in the greater Indianapolis area, with future aspirations of either buying in or opening his own practice. The end will be here before you know it! Live it up for the last few months we are here!

**Matthew Rasche**
While once the “Golden Boy”, Matt has slowed things down in residency and really started to focus on his plans after residency. Matt has met a very nice young lady who makes him very happy, and we all hope that Matt has found someone with whom he can spend a long time. Matt still is planning to practice in Indiana. He will also be traveling to Honduras this semester for a dental mission trip. Wherever the road leads you Matt, good luck in whatever you do. It’s been entertaining getting to have you around for the last couple years.

**Jaime Steele**
Jaime is actively completing her research on fluoride levels in baby foods. While it has been meticulous, to say the least, she seems to be doing very well with her data collection. Her little girl Eliana is turning into a little sweetheart. Other than that, Jaime is continuing to enjoy her organic foods from Trader Joe’s, and is now sporting a classy new tooth positioner! Her plans after graduation are to go to work with Dr. Long in Indianapolis. Her smile and personality will be missed upon graduation. And for those of you who didn’t get a chance to meet her in Chicago last year, she will be present at the New York meeting, so make sure to stop by and have a conversation with her.

**C. Andrew Williamson**
While it’s been a timely matter to be chief resident, it hasn’t turned out to be as difficult as I thought it would be. I have enjoyed this year, but I am also very anxious to complete my training and get back to the Deep South. My research is coming along well, and I have a feeling I will not have any problems completing it in a timely manner. In addition to research and studying for boards, I am also busy planning a move to Tennessee as well as a wedding. That’s right, I am getting married! Angie and I will tie the knot on July 2, 2011 in Greenwood, IN. This is only two days after graduation, so you can only imagine how busy and overwhelmed I feel at times. After the wedding, we will be moving to the area of Spring Hill, TN, and I am planning on taking an associateship with a practice in Brentwood, TN. We are extremely excited to head that way, but I have to say that I will miss many of the patients and families I have developed great relationships with here at Riley!

From all the residents, including those leaving, staying, or just getting to Indianapolis, we again cannot thank the faculty, staff, and alumni that make this program what it is enough. Your generous donations and support to the program do not go unnoticed. Because of all of you, the second year residents were able to travel to San Francisco for the “Comprehensive Review of Pediatric Dentistry” continuing education course, and all the residents will be able to travel to New York for the biannual meeting of the IUPDAA and the national meeting of the AAPD. As we leave the halls of Riley Hospital, all we can say is “Thank you for the opportunity that we have to obtain quality training and education in the field of pediatric dentistry that will serve us for years to come!” See you in New York!!!!!
Business Venture
By Ralph McDonald

During your Undergraduate and Post doctorate Programs, one of your teachers probably mentioned the importance of life-long learning. Another one of your mentors probably referred to the opportunity to conduct some type of clinical or basic science research during your clinical practice. One of our graduates, Dr. Steven R. Branam, IUSD 1974, heeded those suggestions and during his 33 years in pediatric dental practice in Oregon, Ohio, has developed a number of products that he feels are important to our profession.

One of Dr. Branam’s products includes Xylitol, an all natural ingredient derived from plant and fruit fibers. Dr. Branam’s studies indicate that Xylitol is highly effective in combating micro-organisms that lead to chronic ear infection and tooth decay.

When contacted about this article, Dr. Branam said “I would like to the article to mention that I developed and patented an Ortho-Gibby pacifier to improve the oral development of children’s mouths.”

For more information you may visit www.branamsmile.com.

Class Notes

Daniel O’Brien, ’73, writes he has an active practice in Renton, Washington

Julie E. A. Steinmetz, ’10, opened Steinmetz Pediatric Dentistry in December 2010

Matthew Lahair, ’07, said “I have opened a pediatric dental office a year and a half ago (09/08/2009) with my former pediatric dentist Dr. Ted Gallagher. The practice is continuing to grow and things are going great. My wife Melissa and I have a beautiful little girl, Anna, that just turned 16 months who is keeping us very busy but making life all the more enjoyable.”

Editor’s Notes
Spring 2011

by Dr. Ralph McDonald

Dr. Cody C. Hughes, MSD 2009, is the recipient of a faculty loan repayment program award. Like many dental school graduates, Dr. Hughes has significant educational debt. Therefore, UNLV sought Title VII funding to establish a Dental Faculty Loan Repayment Program. Dr. Hughes is a full-time member of the Faculty at UNLV and maintains a part-time pediatric dental practice in Mesquite, Nevada. Dr. Hughes recognizes the immediate benefit of the faculty loan repayment program as a way to engage an academic career.

1) LSU School of Dentistry honors Dr. Robert J. Musselman with an endowed professorship. A successful fund raising drive among former students and friends resulted in the establishment of the professorship. Dr. Musselman received his DDS degree from IUSD in 1966 and then his MSD degree following his internship and residency at Riley Hospital for Children. Dr. Musselman served as a member of the Faculty at IUSD for several years before accepting the Chairmanship of Pediatric Dentistry at LSU.

2) Dr. Brian J. Sanders will be installed as President of the Foundation of the College of Diplomates of the American Board of Pediatric Dentistry May 28th in New York. The Foundation is the fund raising arm of the College of Diplomates that supports the scientific program of the College and provides financial support for the James R. Roche and Arthur J. Nowak awards given annually by the College.

I received the sad news from Richard Skinner, ’79, that his mentor at the University of Connecticut School of Dental Medicine, Dr. Cosmo R. Castaldi, passed away on March 11, 2011, following complications from Alzheimer’s Disease. Cas, as many remember him, was the first full time faculty member at Riley Dental Clinic. Dr. Castaldi initiated a program that assigned undergraduate students to the Riley Clinic on a two half day rotation. Students observed the needs of special patients and provided minor dental procedures. Dr. Castaldi left IUSD in the mid-1950s and returned to his home and the University of Toronto where he taught for a short time before accepting the Chairmanship of the Department of Pediatric Dentistry at the University of Connecticut. Cas retired in 2000 but continued part time teaching and volunteer activities. He is survived by his loving wife, Anita.

Register Now!!!!
IUPDAA Biennial Conference
Wednesday, May 25, 2011
Sheraton New York Hotel & Towers
811 7th Avenue 53rd Street
New York, NY
To register online, go to www.alumni.iupui.edu and scroll down the events calendar.
A yearlong celebration for the 40th Anniversary of IUPUI will begin with a kickoff event at the Campus Center on January 28, 2009. The campus was officially launched on January 28, 1969. The logo as shown has been created to use on events and publications throughout the year. Over the next several months a 40th Anniversary website will be unveiled. Alumni are encouraged to visit the website to learn of upcoming events, participate in requests for stories about their experiences while a student, and many other fun activities.

FAMOUS TEXTBOOK SHARES 40TH BIRTHDAY WITH IUPUI

Not long after IU pediatric dentist Dr. Ralph McDonald accepted the deanship of the IU School of Dentistry, he published a textbook that would put the school in top-tier leadership circles in the international field of pediatric dentistry. Dentistry for the Child and Adolescent’s 1st edition was published the same year that IUPUI officially became a campus, in 1969.

Over the years, Dr. McDonald collected two IU dental school co-editors for his highly successful book – Dr. David Avery joined him for the 3rd edition in 1978, and Dr. Jeffrey Dean, the dental school’s current Executive Associate Dean, for the 8th, and most recent, edition. With publication of the 7th edition in 2000, this remarkable textbook surpassed all other pediatric dentistry texts in the nation in number of editions. The text has been translated into Japanese, Russian, Portuguese, Spanish, and Hindi. The three men are currently hard at work on their 9th edition.

IUPUI Will Celebrate 40 Years

Indiana University Pediatric Dental Alumni Association
Information Regarding Suite at AAPD 2011 Annual Session in New York

We will have our alumni suite opening on Tuesday evening, May 24, 2011, for alumni flying in for the Biennial Conference that is on Wednesday. Our suite this year for the Biennial and AAPD meetings will be at the Hilton New York, 1335 Avenues of the Americas. If we are able to find out the suite number before the conference, we will send a note to everyone. There will be a sign in the Hilton New York lobby to let you know the suite location. Saturday night is our annual alumni party! The suite will be open from 5:00 p.m. – midnight through Saturday evening.

IUPDAA Suite Schedule at the AAPD:

Tuesday, May 24, 2011 Stop in for some refreshments before you head to dinner
