Dear IUSD Alumni,

We hope you will join other Indiana University School of Dentistry alumni and friends on our trip to the Eastern Caribbean. What a nice way to escape the winter weather by sailing to the Caribbean Islands with their crystal clear water and abundant sandy beaches. We are excited about our tropical destinations and the opportunities we have for you to enjoy the camaraderie of traveling with your fellow alumni.

Holland America is a premier cruise line offering spaciousness and elegance with fewer guests and more personal attention. It has a wide variety of amenities and activities, along with the freedom to do as you please.

As a festive way to begin our trip, we will have an alumni welcoming reception the first night on board the ship hosted by the Dean and the Alumni Association. We will visit several islands but will have time for twenty hours of Continuing Education. It is the goal of the IUSD and its Alumni Association to give you an exceptional value — including stateroom, continuing education, and cocktail party(s) for a very reasonable price.

We would suggest that you book your stateroom as soon as possible. We will not be able to hold the staterooms with Holland America at this price forever. We have had some disappointed alumni in the past that waited to book. So, if this interests you, book now.

Phil Conn ’78
President, IUSD Alumni Board of Directors

Fred Sputh, ’77 DDS & George Zundo ’80 DDS
IUSD Alumni Board of Directors
7 Night Eastern Caribbean Cruise on board the Holland America ms Nieuw Amsterdam
January 23 through January 30, 2011

Our Continuing Education speaker for the cruise is Dr. Michael Kowolik. IU School of Dentistry researcher and professor Dr. Kowolik has been using a grant he was awarded from the National Institutes of Health in 2004 to study the possible link between oral inflammatory disease and heart disease risk. Dr. Kowolik’s findings could play a role in helping to identify individuals at greater risk for infections anywhere in the body including those affecting the heart. His work also adds to the body of evidence that dental hygiene plays an important role in a preventive health program for the whole body.

Dr. Kowolik received his dental and Ph.D. degrees from the University of Edinburgh, Scotland, and he completed a specialty fellowship in periodontics and preventive dentistry at The Royal College of Surgeons of Edinburgh. A former researcher for Procter & Gamble, he joined IU’s full-time faculty in 1998. He currently serves as the school’s Associate Dean for Graduate Education and as the Department of Periodontics and Allied Dental Programs’ director of graduate periodontics research.
